

DSP Delivery Excellence Performance

AION at DBY5
Week 6
2026

Week 6 Performance

Overall Standing

Fantastic

See details on next page

Key Focus Areas

1. Delivery Success Conditions (DSC) DPMO
2. Customer escalation DPMO
3. Delivery Completion Rate (DCR)

Announcements

We are pleased to inform you that metric definitions on page 5 and 6 are now available in country specific language. This can be found in the **resources table** and also in the **metric definition section**.

We are surfacing a reminder of the interactive metric modules available below, in the resources section. These modules cover Safety, Quality/Standard Work Compliance & Customer Feedback / Team.

We have updated the supplementary Concessions report with additional “focus areas” that identify delivery factors that may have contributed to the issuance of concessions (Incorrect Scan Indicator, Signature on Delivery , High Value Item, Delivery Exception, Mailbox Eligible). DSPs using the report experience a 35% higher reduction in DNR DPMO compared to DSPs with lower adoption rates.

Note: Users can only access the same geography modules, as example, UK can only access these modules via UK/IE links.

Performance Standards and Service Levels

Per Program Policy, your company's performance will be measured across the following SLS metrics, and your company will be expected to meet the SLS targets included on this page. Below presents the target and minimum service level per metric. If you repeatedly* fall below the Minimum Service Levels (presented below), it can result in a reduction of volume allocated to your company, or termination of your company's Program Agreement

* Definition of Repeatedly = falling below the minimum requirement in 2 consecutive instances (weekly scorecards) below minimum requirement

* Metrics and the associated targets are subject to change. We reserve the right to make amendments with notice in writing including via email, 8 weeks prior to change.

Operational SLS Metrics	Target	Minimum
Scorecard Performance	78	50
Vehicle Audit Compliance (VSA)	98%	95%
Safe Driving (FICO)	810	730
DVIC Compliance	95%	90%
Speeding Event Rate (per 100 trips)	5	10
Customer Escalation DPMO	0.02	160
Customer Delivery Feedback	3680	5460
Route Reliability	100%	85%
Delivery Completion Rate (DCR)	99%	97%
Delivery Success Conditions (DSC DPMO)	880	1300
Photo On Delivery	98%	96%
Contact Compliance	98%	95%
Lost on Road DPMO	50	200

Metric Definitions

[UK/IE](#)

[DE/AT](#)

[ES](#)

[FR](#)

[BE](#)

[NL](#)

[IT](#)

Safety

Includes metrics such as Vehicle Audit (VSA) Compliance, Safe Driving Metric, Seatbelt off Rate (only for UK DSP 2.0s), Speeding event Rate, Daily Vehicle Inspection Check Compliance and E-Mentor Adoption Rate. (See Below for more details)

Vehicle Audit (VSA) Compliance

Vehicle Audit (VSA) Compliance is calculated as the DVIC Checks verified by Amazon over last two weeks. We calculate this metric as the count of vehicles that have passed Amazon's VSA check against the total number of vehicles audited during WK-2 and WK-1. Vehicle Audit (VSA) Compliance calculation: Total VSA Passed Audits (WK-2 & WK-1) / Total VSA Audits (WK-2 & WK-1). A DSP who has Fantastic standing would receive a $\geq 98\%$ in VSA.

Safe Driving Metric (FICO)

This metric is calculated using the eDriving Mentor FICO score, which is a composite potential indicator of a driver's safe driving behaviour. The metric is measured by analysing indicators of how your drivers operate their vehicles, such as Harsh Acceleration, Braking, Cornering, Cell phone Distraction and Speeding. The metric is a weighted average of all driver's eDriving Mentor FICO scores at the end of the week on a 100 – 850 scale where a higher score is better. A DSP who has Fantastic standing would receive a ≥ 810 in FICO.

Speeding Event Rate

The Speeding Event Rate metric is the average number of speeding instances incurred by a DA per route. A speeding instance is counted as exceeding the speed limit by 20% or more for at least 60 seconds. A DSP who has Fantastic standing would receive a $\leq 5\%$ speeding events per 100 trips.

E-Mentor Adoption Rate

The E-Mentor Adoption Rate allows you to understand what percent of your drivers are using Mentor App on a weekly basis. This metric is calculated by number of active drivers on the Mentor app divided by total active drivers for the particular week. If your drivers have low adoption rates, your other safety metrics might be impacted, resulting in overall lower score. We encourage DSPs to increase eMentor app adoption rate with the drivers to help support improved driver behaviour. A DSP who has Fantastic standing would receive a $\geq 90\%$ in E-Mentor Adoption Rate.

Compliance

We regularly audit for compliance to ensure DSP's business operations adhere to Amazon supply chain standards and program policy.

Comprehensive Audit Score

The Comprehensive Audit is a measurement of DSP/Driver Eligibility, DSP Operations, Safety, Wages & Benefits, DSP Management, and Working Hours (all measurements outlined in the DSP Program Agreements and Policies). The results of the Comprehensive Audit provide a baseline for a DSP's state of compliance. Compliance is critical to ensuring a good working environment for you and your drivers and meeting our compliance standards is required. You must earn an 'In Compliance' on your Comprehensive Audit to be eligible for scorecard evaluation and not be in Breach of Contract (BOC). A DSP who has Fantastic standing would receive a 100% in CAS.

Working Hour Compliance (WHC)

WHC metric is based on a DSP's continuous compliance with working hour requirements as established by Amazon Supply Chain Standards, Amazon Logistics business policy, and prevailing local law. This includes compliance with: Daily and weekly working hour thresholds; Maximum permissible consecutive workdays; and Minimum required rest between shifts. The metric is calculated as % of drivers complying with working hour limits. A DSP who has Fantastic standing would receive a 100% in WHC.

Delivery Quality

Includes metrics: Delivery Completion Rate, Delivered not Received DPMO and SWA On-time Arrival (DSPs within the SWA program)

Delivery Completion Rate

The share of packages dispatched to the drivers which are delivered to the customer (and not returned to the station). Thresholds are set at the station level to account for regional differences. A DSP who has Fantastic standing would receive a $\geq 99\%$ in DCR.

Delivered Not Received DPMO

The number of packages delivered but not received by customer, on per million opportunities / delivered (DPMO) basis. Thresholds are set at the station level to account for regional differences. A DSP who has Fantastic standing would receive a ≤ 1200 in DNR DPMO.

Lost on Road (LoR) DPMO

The number of packages dispatched to the drivers but not delivered to the customer (and not returned to the station), on per million opportunities / dispatched (DPMO) basis. A DSP who has Fantastic standing would receive a ≤ 50 LoR DPMO.

Delivery Success Conditions (DSC DPMO)

The number of packages delivered but not received (DNR) by customers — on a per-million-opportunities / delivered (DPMO) basis — where these DNR concessions fall into one of eight root-cause buckets of concessions:

- Delivered to Household Member / Customer
- Delivered to Receptionist
- Delivered to Neighbor
- Delivered to Mailbox
- Delivered greater than 25 metres from the delivery location
- Delivered unattended with no photo-on-delivery (POD)
- Delivered not following customer preferences
- Delivered using the 'simultaneous group stop' function

DSC is measured in DPMO (Defects per Million Opportunities). A DSC DPMO of 1,000 means that customers did not receive their packages 1,000 times per 1,000,000 deliveries. A DSP with Fantastic standing would require a DSC DPMO ≤ 880.

Standard Work Compliance

Includes metrics on Photo on Delivery, Contact Compliance and SWA Scan Compliance (only applicable for DSPs within the SWA program)

Photo on Delivery

The number of usable (i.e. presentable to the customer) POD (Photo-on-delivery) photos taken, divided by total POD opportunities. A DSP who has Fantastic standing would receive a >=98% in Photo on Delivery.

Contact Compliance

The metric is calculated as the count of all calls and texts that were made by a driver through the Amazon Flex app vs the total packages delivered with a call or text, as well as packages not delivered due to reasons such as Unable to Access (UTA), Unable to Locate (UTL), No Safe Locations (NSL). A DSP who has Fantastic standing would receive a 98% in Contact Compliance.

Customer Feedback

Includes Customer Delivery Feedback DPMO and Customer Escalations DPMO

Customer Delivery Feedback

CDF DPMO metric is a measurement of the negative customer feedback received — on a per-million-opportunities / delivered (DPMO) basis. A DSP who has Fantastic standing would receive a <= 3680 in CDF.

Customer Escalations DPMO

Customer Escalations DPMO: The frequency at which drivers incur customer escalations, on a per-million opportunities (DPMO) basis. Violations are triple-weighted, and Defects are single weighted. Only successfully resolved tickets with customer escalations are counted with a 4-week delay. For example, Week 45 Scorecard Escalation Defect DPMO is calculated by counting and weighting the feedback incurred by drivers in Week 41 and not overturned by appeals. A DSP who has Fantastic standing would receive a 0 in Customer Escalations DPMO.

Capacity

Includes Capacity Reliability

Capacity Reliability

Capacity Reliability compares your completed routes per day (excluding any Amazon caused cancellations) from Work Summary Tool to your day-level Reliability Targets from Route Targets (Okami) with an exception; if your final day-before scheduled plan comes in lower due to Amazon caused cancellations, those cancelled routes will be subtracted from your Reliability Target.
